

## An Dannsa Dub present: 'Through The Storm – The Remixes'

Following the widespread acclaim of their 2025 release, An Dannsa Dub return with a full remix collection that underlines the impact their genre-defying sound has had across the dub and global bass community. Blending Scottish folk traditions with reggae, dub and dubstep, the original album sparked attention for its ability to bridge ancient melodies, contemporary production and heavyweight sound system culture — and this remix EP expands that vision even further.

Across nine tracks, producers and artists from different corners of the international dub scene reinterpret the material through their own sonic lens. From the drum'n'bass pulse of Hippo Sound System's rework of "The Storm Gathers," to the psychedelic textures, steppers rhythms and cinematic bass explorations found throughout the release, the EP demonstrates the versatility and strength of An Dannsa Dub's songwriting. Rather than dismantling the original compositions, the remixers "dress" them differently, revealing new emotional colours and club-focused dimensions while preserving the spirit of the source material.

The collection also brings together two remixes previously released during the original album campaign: Paolo Baldini DubFiles' celebrated reinterpretation of "Kick Up The Dub" and GAUDI's powerful version of "Tha Mi Air Chall." Initially unveiled as standalone singles ahead of the album release, both tracks now find their place within the wider remix journey alongside new contributions from Pen Dub, No Ice Cream Sound, Kandee, Noise Pollution Academy, Danubian Dub and Tiberias Towa.

At the same time, An Dannsa Dub are already looking ahead. The band is currently writing and recording new material for their next studio album, planned for release by the end of 2026. Earlier this year they unveiled "Tall As A Mountain," the first glimpse of this new chapter, receiving strong support and airplay including spins on the BBC and positive feedback from across the folk, dub and alternative music scenes.

Tracklist:
